RAW FEEDING – SO SIMPLE – SO HEALTHY

HOW MUCH TO FEED

The amount you need to feed depends on the age of your dog, their activity level and whether their current weight is appropriate.

It is important to weigh raw food so you will know how much you are feeding your dog each day. Your dog’s daily portion of food may be fed in single or multiple meals.

TIP- calculate the weight of a daily portion for your dog, following the guidelines below. Then weigh out that amount of food using a scale. Thereafter you can “eye ball” the size of that portion and not have to weigh the food at each feeding.

Active Dogs - 3% of the animals body weight

Non- active Dogs - 2% of the animals body weight

Puppies – 4- 5% of their body weight

What if I want my dog to gain or loose weight?

Calculate the weight you want your dog to change to e.g. go from 50 lbs to 45 lbs – then feed the % recommend for your dog (per the guideline above) but calculated at the new weight. For example – if you want your currently 50lb dog to loose 5 lbs- calculate his % on the basis of 45 lbs.

HANDLING & STORAGE TIPS

Thaw and serve as is DO NOT COOK- FOOD CONTAINS GROUND BONE

- keep frozen until ready to use-
- Thaw in refrigerator or microwave- if using microwave be careful not to cook the food!
 - Keep raw food separate from other foods
- Wash working surfaces, utensils with hot soapy water
 - Refrigerate leftovers immediately – or discard

TIP- I feed our 4.8 lb packages. I remove the packaging and thaw them in an 8x8 glass container. Once thawed- I feed the serving size as needed and refrigerate the remainder in the dish. It is easier and tidier to store than in the packaging and spooning out the next serving is easy to do!

MENU PLAN

BASIC DIET

Mountain Dog Food is formulated to comprise the BASIC Daily Diet for your dog. It is recommend that you alternate between the MDF chicken and turkey blend formulations to ensure your dog has variety in their basic diet.

SUPPLEMENTING THE BASIC DIET

In addition to the basic MDF meals your dog's diet needs to include the following:

- ORGAN MEAT (liver, heart, kidney- to max of 10% of the weekly diet)
- RAW MEATY BONES (chicken backs, necks, turkey necks) – to ensure clean teeth and gums, and a balanced diet
- Omega 3 supplement (fed daily- mammal based Omega 3 is best!)

Additionally, food such as raw eggs, cottage cheese & yogurt are great diet boosters

SUGGESTED WEEKLY MENU

The following weekly menu plan is designed to help you get started on RAW FEEDING using MDF as the basis of a well balanced diet for your dog.

Daily MDF chicken or turkey blend – alternate every few days

Daily Omega 3 under 50 lb ¼ tsp, over 50 lbs ½ tsp
- feed mammal based product such as AUUM Omega 3 - available through 4 PAWS Training

Every 2 days Raw Eggs

Every 2 -3 days Raw bones (chicken backs, chicken necks, chicken wings)

Weekly Organ Meats- liver, or heart or kidney
- in lieu of regular meal OR as ½ a meal – if feeding multiple meals/day

Weekly Yogurt, cottage cheese, cheese- can also feed as treats
